

Do You Know When to Shred?

Robust data security practices begin with knowing when and what to shred to keep important or confidential documents safe from risk. Shred-it, a leading information security service provided by Stericycle, can help you understand how to keep confidential work information and personal data safe and secure.

83%

OF AMERICANS

indicated that information security is a top priority for them when choosing who to do business with. Organizations have a critical responsibility to protect their data to maintain trust.

Use the decision tree on the right to determine when to shred.

DOES YOUR ORGANIZATION PRODUCE CONFIDENTIAL INFORMATION?

Warning! All organizations produce confidential information. Even basic information that may not seem confidential could be harmful when falling in the wrong hands.

Organizations should consider implementing a **Shred-it all policy** to help ensure all confidential information is securely disposed.

Knowing which information is confidential is important to maintain a strong information security program.

Are you aware which information is confidential and when and how to dispose of it?

How do you store this information?

ELECTRONIC
